Using the Calculator to Compute the Future Value of a Single Amount

Before you begin, make sure to clear the memory, ensure that you are in the *end mode* and that your calculator is set for *one payment per year*, and set the number of decimal places that you want (usually two for dollar-related accuracy).

Sample Problem

You place \$800 in a savings account at 6% compounded annually. What is your account balance at the end of 5 years?

Hewlett-Packard HP 12C,
17 BII, and 19 BII^a

Input	Function
800	PV
5	N
6	I%YR
	FV
Solution ^b	
1,070.58	

^aFor the 12C, you would use the **n** key instead of the **N** key and use the **i** key instead of the **I%YR** key.

^bThe minus sign that precedes the solution should be ignored.

**Texas Instruments,
BA-35, BAIL,
and BAIL Plus^c**

Input	Function
800	PV
5	N
6	%i
	CPT
	FV
Solution ^d	
1,070.58	

^cFor the Texas Instruments BAIL, you would use the **2nd** key instead of the **CPT** key; for the Texas Instruments BAIL Plus, you would use the **I/Y** key instead of the **%i** key.

^dIf a minus sign precedes the solution, it should be ignored.

*PVIF is zero to three decimal places.

Using the Calculator to Compute the Present Value of a Single Amount

Before you begin, make sure to clear the memory, ensure that you are in the *end mode* and that your calculator is set for *one payment per year*, and set the number of decimal places that you want (usually two for dollar-related accuracy).

Sample Problem

You want to know the present value of \$1,700 to be received at the end of 8 years, assuming an 8% discount rate.

Hewlett-Packard HP 12C,
17 BII, and 19 BII^a

Input	Function
1700	FV
8	N
8	I%YR
	PV
Solution ^b	
918.46	

^aFor the 12C, you would use the **n** key instead of the **N** key and use the **i** key instead of the **I%YR** key.

^bThe minus sign that precedes the solution should be ignored.

Using the Calculator to Compute the Future Value of an Ordinary Annuity

Before you begin, make sure to clear the memory, ensure that you are in the *end mode* and that your calculator is set for *one payment per year*, and set the number of decimal places that you want (usually two for dollar-related accuracy).

Sample Problem

You want to know what the future value will be at the end of 5 years if you place five end-of-year deposits of \$1,000 in an account paying 7% annually. What is your account balance at the end of 5 years?

Hewlett-Packard HP 12C,
17 BII, and 19 BII^a

Input	Function
1000	PMT
5	N
7	I%YR
	FV
Solution ^b	
5,750.74	

^aFor the 12C, you would use the **n** key instead of the **N** key and use the **i** key instead of the **I%YR** key.

^bThe minus sign that precedes the solution should be ignored.

**Texas Instruments,
BA-35, BAIL,
and BAIL Plus^c**

Input	Function
1000	PMT
5	N
7	%i
	CPT
	FV
Solution ^d	
5,750.74	

^cFor the Texas Instruments BAIL, you would use the **2nd** key instead of the **CPT** key; for the Texas Instruments BAIL Plus, you would use the **1/Y** key instead of the **%i** key.

^dIf a minus sign precedes the solution, it should be ignored.

Using the Calculator to Compute the Present Value of an Annuity

Before you begin, make sure to clear the memory, ensure that you are in the *end mode* and that your calculator is set for *one payment per year*, and set the number of decimal places that you want (usually two for dollar-related accuracy).

Sample Problem

You want to know what the present value of an annuity of \$700 received at the end of each year for 5 years, given a discount rate of 8%.

Hewlett-Packard HP 12C,
17 BII, and 19 BII^a

Input	Function
700	PMT
5	N
8	I%YR
	PV
Solution ^b	
2,794.90	

^aFor the 12C, you would use the **n** key instead of the **N** key and use the **i** key instead of the **I%YR** key.

^bThe minus sign that precedes the solution should be ignored.

**Texas Instruments,
BA-35, BAIL,
and BAIL Plus^c**

Input	Function
700	PMT
5	N
8	%i
	CPT
	FV
Solution ^d	
2,794.90	

^cFor the Texas Instruments BAIL, you would use the **2nd** key instead of the **CPT** key; for the Texas Instruments BAIL Plus, you would use the **1/Y** key instead of the **%i** key.

^dIf a minus sign precedes the solution, it should be ignored.
