FINANCIAL STRATEGY FOR ENTREPRENEURS

CHARASPONG SARAVISUTRA
19 OCTOBER 2025

Financial Strategy for Entrepreneurs

Personal Finance

What can we do with **MONEY**?

Earn → Use → Save → Invest → Grow

Which one is hardest?
Which one you are good at?

	Personal	Business
Earn	Salary	Revenue
Use	Spending	Cost
Save	Savings	Cash
Invest	Assets	CAPEX
Grow	Business	Profit

Top List of Business Key Terms

No.	Financial Element	Meaning / Why It Matters
1	Revenue (Sales)	Total income earned from selling products or services; the primary indicator of business performance.
2	Cost of Goods Sold (COGS)	Direct production or service-delivery costs; used to calculate gross profit.
3	Gross Profit	Revenue minus COGS; shows how much value remains from each sale before covering other costs.
4	Expense	All money spent to operate the business, including both fixed and variable costs; affects profitability.
5	Operating Expenses (OPEX)	Indirect running costs such as salaries, rent, utilities, and marketing; must be managed efficiently.
6	Operating Profit (EBIT)	Profit from core operations before interest and tax; shows how well the business performs operationally.
7	Net Profit (Bottom Line)	The final profit after deducting all expenses, interest, and taxes; represents true business success.
8	Cash Flow	The actual inflow and outflow of money; vital for paying bills and sustaining operations.
9	Working Capital	Current assets minus current liabilities; measures short-term liquidity and stability.
10	Capital Expenditure (CAPEX)	Investment in long-term assets (equipment, property, technology) to expand capacity or efficiency.

Business Terms in Life

Revenue is **food** to feed the business.

Costs and Expenses are the **calories** we burn to stay alive.

Profit is the **energy** we keep and grow with.

Cash flow is the **blood** that carries it all around.

Cash is the **oxygen** that keeps us breathing every day.

To *Grow* or To *Survive*

If you want to Grow

Revenue | Cost | Profit

If you want to Survive

Cash Flows

A close-up photograph of a person's hand, wearing a green and red wristband, pointing with a silver pen at a tablet. The tablet displays various financial charts, including a pie chart and a bar chart. In the background, a laptop and a desk with other items are visible, slightly out of focus. A semi-transparent dark grey banner is overlaid across the middle of the image, containing the title text in white.

5 GOLDEN FINANCIAL TIPS FOR ENTREPRENEURS

TIP #1:
IF YOU CAN'T GROW REVENUE,
EXPAND MARGIN INSTEAD

TIP #2:
ALWAYS PRICE
WITH MARGIN, NOT MARKUP

**TIP #3:
TURN COSTS
INTO INVESTMENT**

REED HASTINGS
TIP #4:

**USE DEBT TO BUILD,
NOT TO SURVIVE**

**TIP #5:
MANAGE BY CASH FLOW,
NOT BY PROFIT**

Key Takeaway

Imagine that managing a business...
...is the same as managing your health.

If you want to,

- ...live long, make sure your blood flows well – *that's your cash flow.*
- ...grow strong, make sure you have good food – *that's your revenue*
- ...good oxygen – *that's your cash*
- ...and burn your calories efficiently – *that's your cost management.*

The healthier your financial body,
...the longer your business will live.
