

# Career Planning

This area includes all information about university career training, the courses that belong to each career training path, and the professors that teach those courses.

The assumed requirements are:

- The university can have multiple careers (like "Mechanical Engineering" or "Psychology"). Careers can have different durations and levels (undergraduate, graduate, etc.).
- Each career belongs to one and only one department (like science, literature, etc.)
- Each career is composed of a number of courses, which may be mandatory or optative (elective).
- Each course belongs to a year and a semester.
- A course may require a previous course to be completed by a student before they can enroll in it.
- More than one professor can teach the same course.
